#### Public Records:

Returns detailed information for any bankruptcies, judgments or liens on file for the business; also returns business registration information obtained from Secretary of State Offices or other trusted sources. Business registration fields include:

- Registered Name: The business name provided at the time of registration.
- Filing Date: This is the date the state recorded as the paperwork transaction date. It may or may not be the same as the incorporation date. This date will usually change annually and is used to indicate when the most recent update was received by the state. It is possible that the filing date is several years old because the state did not update a "lapsed or inactive filing".
- Incorporation Date: This is the date of the original filing of incorporation papers. It will not change from year to year. This is not the date the business filed the papers with the state.

- Incorporation State: This may include any of the 50
   U.S. states plus Washington, D.C.; only the "domestic" incorporation state is returned.
- Status: This field reflects the status of the business on the records of the Secretary of State. It is not necessarily an indication of whether the business actively engages in business activity. It will not reflect whether the entity has filed for bankruptcy. There are two valid status values: active and inactive.
- Registry Number: This is the number assigned by the state office.
- Contact Name, Title, Address: This field includes officer names, titles and addresses. More than one officer may be returned. Additionally, not all the officers may be listed.
